Slide, Cassette, Tissue Block Filing Kit

Durable, Economical and Versatile Path Lab Storage System

This durable corrugated filing box kit can store glass slides, cassettes, or tissue blocks in either a dedicated fashion or in combination. 500 cassettes store in the stacked trays and 2000 slides are in a single level tray per kit.

Boxes are stackable up to 12 high with glass slide as inventory (lighter cassettes more).

This kit includes In/Out cards for inventory control and replacement. The slide configuration also contains sub-indexing tab cards.

Each tray has a double row for slide or cassette storage. The cassette kit contains 8 trays and the slide kit contains 4 trays.

Each kit also has 50 convenient pink In/Out inventory cards for detailing removal information and being a place keeper. The slide kit also has 25 green index cards for sub-categorizing slide inventory.

The front closure end is easily written on for a complete inventory identification.

Note the 2 tabs centered on the top of the box that indexes into the bottom of the box stacked above. This maintains a secure alignment of the stack.

A durable design and a double internal corrugated construction can support up to 300 lbs. The stack does not collapse and the trays remain easily accessible.

In order to minimize shipping costs as well as preserving laboratory space until needed, the file kits come unassembled in packages of 10 kits

Each kit has full assembly instructions printed on the bottom and complete kit assembly is done in a just few minutes.
